ESTADO LIBRE ASOCIADO DE PUERTO RICO LA FORTALEZA SAN JUAN, PUERTO RICO Boletín Administrativo Núm. OE-2015-0

ORDEN EJECUTIVA DEL GOBERNADOR DEL ESTADO LIBRE ASOCIADO DE PUERTO RICO, HON. ALEJANDRO J. GARCÍA PADILLA, PARA ORDENAR A LA SECRETARIA DEL DEPARTAMENTO DE SALUD A QUE, CUMPLIDAS LAS DISPOSICIONES QUE REQUIERE LA LEY NÚM. 4 DE 23 DE JUNIO DE 1971, SEGÚN ENMENDADA, CONOCIDA COMO LA "LEY DE SUSTANCIAS CONTROLADAS DE PUERTO RICO", AUTORICE EL USO MEDICINAL DE ALGUNAS O DE TODAS LAS SUSTANCIAS CONTROLADAS O COMPONENTES DERIVADOS DE LA PLANTA DE CANNABIS

POR CUANTO: La salud es un derecho fundamental de todo ciudadano y ciudadana que reside en este país.

POR CUANTO: La prestación de servicios de salud se nutre diariamente de nuevos avances y acercamientos tecnológicos para el tratamiento de las enfermedades que aquejan a las poblaciones.

POR CUANTO: En esa dirección de avances y acercamiento para el tratamiento de enfermedades, estudios publicados desde 1999 por la National Academy of Sciences, Institute of Medicine, la American Academy of Neurology, la American College of Physicians, la American Nurses Association, la American Public Health Association, la American Medical Association y la Leukemia and Lymphoma Society demuestran el valor terapéutico de la planta del Cannabis y sus derivados en el tratamiento de una amplia gama de enfermedades debilitantes. Algunos de los estados que han permitido el uso medicinal de esta planta son los siguientes: Alaska, Arizona, California, Colorado, el Distrito de Columbia, Hawaii, Maine, Michigan, Montana, Nevada, Nuevo México, Nueva Jersey, Oregon, Vermont, Rhode Island y Washington.

POR CUANTO: Estas investigaciones avalan el uso de dicha planta para el alivio del dolor neuropático causado por la esclerosis múltiple, el Virus de Inmunodeficiencia Adquirida (VIH/SIDA); el glaucoma; el Alzheimer; la epilepsia; la migraña; la esclerosis múltiple; el Parkinson y; otras enfermedades que a menudo no responden a los tratamientos convencionales.

CANNABIS MEDICINAL IMPACTO ECONÓMICO

Para 2016, se prevé que entre 101.000 y 154.000 personas trabajen el sector de venta de marihuana, bien sea en los dispensarios o tiendas, los cultivadores legalizados o las empresas asociadas.(Archivo / GFR Media)

Why Puerto Rico? Why now? A launching platform for the Americas

- → Patients clinical needs
- → Health policies changes
- ★ Integrated collaboration with academia
- **→** Multidisciplinary approach
- → Human capital
- → Ideal climate and photoperiod for cannabis cultivation
- → Medical tourism
- → Tax incentives (manufacturing and exports)

OUR COMMITMENT

- → Promoting evidencedbased clinical cannabis solutions to support healthcare providers.
- → Offering pharmaceutical grade medical cannabis, through a process that goes from seed to clinical practice.

Lab, Safety, Post-marketing Surveillances, eHealth, Education & Training, Tax Incentives

ASPR

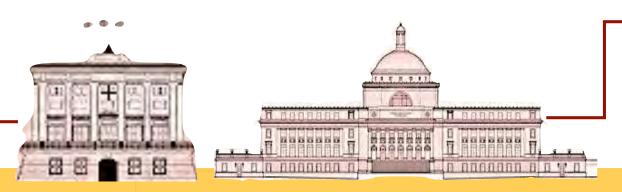

Technology Transfer Translation of Science

ASPR

MC LOGISTIC, LLC

A projected 1.2%- 4% patient adoption rate without the need for relocation to the United States

Generation of multi-million tax revenues.

Why Puerto Rico government support medical cannabis?

BENEFITS AND TAX REVENUE

37,000 to 100,000Puerto Rican patients once the program is fully implemented

The Medical Cannabis industry will create a new infrastructure, and could add over **3,000** direct and indirect new jobs to support Puerto Rico economy upon full implementation

Governmental affairs

Assurance and quality control

Agriculture

Cell Biology

Scientific research

PUERTO RICO support

USA Support

Over 15 years of cannabis business experience in multiple fields

Scientific research

Design and optimization of laboratory processes and equipment

Pharmacology, botany, and cannabinoid extraction

TECHNOLOGY Transfer

Currently available technology

MCI TECHNOLOGY PLATAFORM

MCI and its partners have developed a seed to PGCF tracking software to manage the entire program from cultivation to the patient, allowing governmental oversight of all supply chain management and regulatory compliance.

INVENTORY TRACKING

The software tracks inventory protecting against theft and diversion into the black market.

DATA ACQUISITION & RESEARCH

The software will track a vast array of data points that spans the cannabis life cycle from; cultivation, laboratory testing, clinical trials, illness alleviation, and medical cannabis treatment success.

Scope of Business

Experimental Agriculture Substation
Henry Klumb Architectural Facilities (Subtropical Rainforest)

Phase 3 project will consist of:

- ← Cannabis Environmental Secured Tropical Greenhouse (cost effective investment)
- ★ Extraction Facility
- → Clinical Administrative Office
- ★ Storage and Distribution space
- ★ Visiting Faculty Facilities
- → Natural water sources, water cistern and electrical generator
- → Development of Pharmaceutical Compounding Research Lab at Gurabo Experimental Agriculture Substation

ABSTRACT

The US federal government and the state government of Puerto Rico are facing a difficult fiscal outlook due to the economic crisis in recent years. According to the "CIA World Factbook" (2015), the U.S. federal debt represents approximately 72% of gross domestic product GDPL its highest level since World War II, while Puerto Rico's debt is 92% of GDP. The legalization of cannabis for medicinal and recreational use has been presented as an economical alternative to raise funds to the treasury through taxes imposed on the sale of derivatives of the plant. Several US states have legalized medicinal and recreational cannabis and according to economist Jeffrey Miron, in the case of United States "it is estimated that by legalizing this drug it'll be assigned a 30% tax. When this happens the government will receive approximately \$6.2 billion annually due to taxes as assigned to any other product such as alcohol and snuff." Price elasticity studies show the sensitivity of consumers to price changes due to the legalization of the plant. In the case of Puerto Rico, the potential economic impact of the general legalization for the island must be analyzed, creating an industry focused on medical research and production of medicines derived from cannahis.

Key would

cannabis, economic impact, legalization, medicinal cannabis, recreational cannabis, cannabis Puerto Rico, price elasticity.

RESUMEN

El gobierno federal de Estados Unidos y el gobierno estatal de Puerto Rico se enfressan a un nanorama fiscal difficil debido a la crisis económica. que arraviesan durante los últimos años. Según el "CIA World Factbook" (2015), la deuda de Estados Unidos representa aproximadamente el 72% del Producto Interno Bruto (PIB), su nivel más alto desde la Segunda Guerra Mundial. mientras que la de Puerto Rico es de un 92% del PfB. La legalización del cannabis, para uso medicinal y recreativo, se ha presentado como una alternativa economica para allegar fondos al fisco a truvés de impuestos finados a la venta de derivados de dicha planta. Diferentes estados de los Estados Unidos ya han legalizado el uso medicinal y recreativo del cannabis y según el economista Jeffrey Miron, para el caso de Estados Unidos: "se estima que al legalizar esta droga se le asigne un impuesto de 30%. Al esto ocurrir el gobierno recibirá aproximadamente \$6.2 billones anuales debido a los impuestos tal y como se le asigna a cualquier otro producto como por ejemplo: el alcohol y el tabaco". Estudios de elasticidad de precios muestran la semitividad de los consumidores a cambios en precio gracias a la legalización de la planta. En el caso de Puerto Rico, se debe analizar a fondo el posible impacto econômico que puede traer a la Isla la legalización general, la creación de una industria enfocada en la investigación médica y producción de medicamentos derivados del cannabis.

Palabras clayes:

cannabis, impacto económico, legalización, cannabis medicinal, cannabis recreativo, cannabis Puerto Rico, elasticidad de precios.
